Executive Synopsis

Flutter Developer with 4 Years of Experience Seeking a new Challenge. Passionate about crafting clean architecture and writing well-structured, readable, and easily testable code. Committed to leveraging best-practice Agile development methods to enhance team effectiveness. A highly organized and efficient professional with a methodical approach to projects, consistently delivering outstanding results.

Work Experience

Flutter Developer, Webtree Software Solution Mangalore	Jan 2024 - Present
Flutter Developer, Nintriva Kochi	May 2021 - Nov 2023
Junior Software Engineer, Websoullabs Kochi	Sep 2020 - Feb 2021

Education

MVoc in Mobile Phone Application Development CUSAT, Kochi	2018-2020
Bvoc Software Development Carmel College, Mala	2015-2018

Projects

Trrings

Trrings is a social media platform tailored for Arab countries, combining key features inspired by Twitter and Instagram to enable real-time sharing of photos, short videos, and social interactions.

As a Flutter Developer, my responsibilities include:

- Designing and implementing scalable mobile application architecture following Clean Architecture principles to ensure performance and maintainability.
- API Integration: Integrating backend services, RESTful APIs, and third-party SDKs to support real-time and social features.
- UI/UX Implementation: Translating UI/UX wireframes into responsive, high-quality Flutter screens with smooth

Implementing state management using BLoC for predictable and scalable application behavior.

- Integrating real-time communication and media features using Firebase, Zego UIKit, and CometChat.
- Collaborating with backend teams working on Java-based services to ensure seamless data flow and feature integration.

D-GLOBAL

D-GLOBAL Technician App is a mobile solution designed for elevator and lift service technicians to efficiently manage job scheduling, maintenance tasks, and service reporting through a single mobile platform.

- Developed responsive UI screens using ScreenUtil to support multiple device sizes.
- Implemented digital signature capture for customer approvals and service confirmation.
- Integrated PDF preview and URL launcher for viewing service documents and manuals.
- Used Provider for state management to ensure smooth and predictable app behavior.
- Enabled offline-friendly workflows and seamless data handling for field technicians.

Bin Faqeeh

Bin Faqeeh Real Estate App showcases premium real estate properties from Bin Faqeeh, one of Bahrain's leading developers, offering a rich and engaging mobile experience for luxury property discovery.

- Developed a Flutter-based mobile application to showcase luxury real estate projects.
- Implemented detailed property listings with floor plans, images, and multimedia content.
- Built smooth, responsive UI screens optimized for various mobile devices.
- Published and maintained the application on the Google Play Store.

Just Borrow

Rental Marketplace App is a mobile platform that connects renters and borrowers, enabling users to list, browse, and rent items such as sports gear, apparel, gaming accessories, kids' cycles, and electronics.

Worked on developing a user-friendly rental application with smooth navigation, item availability tracking, and reminder-based workflows.

- Developed responsive mobile UI using Flutter and Dart
- Integrated backend services and REST APIs built with PHP
- Implemented state management for smooth user interactions
- Added return reminders and availability-based item workflows
- Ensured clean, maintainable code and optimized app performance

Toffee Ride App

Toffee Ride is an interactive learning application designed to help children build strong foundational and language skills through engaging lessons and activities.

Contributed to the development of a large-scale educational app featuring 1100+ lessons and 8000+ interactive activities, focusing on performance, scalability, and child-friendly UI.

- Built and maintained Flutter UI using Flavors to support multiple environments.
- Implemented Clean Architecture with BLoC for scalable state management.
- Used Hive DB for fast local data storage and offline access.
- Integrated Firebase services for analytics, notifications, and app monitoring.
- Deployed and managed cloud services using AWS.
- Collaborated with backend services developed in PHP to ensure smooth data flow.

Skills

- | | |
|-------------------------------------|---------------------|
| • Dart | • Xcode |
| • Version control | • Agile Development |
| • API integration with RESTful APIs | • BitBucket |
| • Firebase | • Jira |
| • Getx | • Team management |
| • Bloc | • Code review |
| • Provider | • Postman |
| • MVC / MVVM | • Figma |
| • Clean Architecture | • Hive DB |
